City Learning Centres

new learning centres and library facilities in camden, lewisham and lambeth

Sprunt designed and developed London's first three City Learning Centres (CLC's).

CLC's are designed "to provide opportunities for disadvantaged areas". Driven by the integration of computer technology they are normally situated within school sites.*

Each of the three schools, Acland Burghley School, Forest Hill School and Stockwell Park provided their own challenge. Sprunt employed its experience in space planning and master planning to develop three diverse sites into community based learning centres.

Acland Burghley was a new build project and, uniquely, its master plan was developed via a property management and maintenance system, designed and developed by Sprunt's sister company Quadpro property management.

The brand new centre provided Acland Burghley with a refurbished reception, expanded library facilities and a modern play area.

Stockwell Park involved the refurbishment of a disused top floor of an existing building. Forest Hill was a new extension incorporating a new sixth form.

Accessible well beyond the normal school day, Sprunt's strong record in the design and development of ICT suites facilitated the transformation of these schools into community based networks where pupils, parents and the wider community can develop their skills.

*set out by DFES – www.dfes.gov.uk

Location:
Camden, Lewisham & Lambeth

Client:
London Boroughs of Camden, Lewisham and Lambeth

Project:
New learning centres for Acland Burghley, Forest Hill and Stockwell Park Schools

Value:
£0.5m, £0.7m and £1m respectively

Status:
Complete

"These programmes have created welcoming new forums for all age groups of the local communities to use."
