

NHS Local Improvement Finance Trust (LIFT)

primary care

NHS Local Improvement Finance Trust is a government initiative designed to bring significant improvements to the delivery of Primary Care in the most deprived areas of the country. Sprunt is part of a consortium which partners a public/private partnership with Camden & Islington Primary Care Trust.

The bidding process involved designing three health centres over a very short timescale. We worked closely with our contractor and developer partners, Bluestone Plc, and held regular consultations with each user group, and three projects are now complete.

Cost control in design was vital. The maintenance and running costs as well as the construction costs were reviewed and managed during the whole design process. Value Engineering workshops were held to ensure each of the projects economically provide effective long term solutions.

We are now working closely with the PCT to develop further schemes. Each of the schemes involve not just health facilities but also community rooms, and in some cases, housing for key workers.

Location:
Camden & Islington, London

Client:
Community Solutions for Primary Care

Project:
New Primary Care Centres within Camden and Islington

Value:
£2.5m - £8m

Status:
Ongoing

“Success depended upon integrated working between the client and members of the supply chain.”
