

Rockmount School

Amalgamation of two schools to form one 2FE primary school (BREEAM Very Good)

The project involved amalgamating this split site school into a 2 FE primary school on one site.

Working from a concept design by ECD, Sprunt took the project from Stage D to completion. This involved a critical review of the scheme to reduce costs to within the budget without compromising the design intent and we developed the sustainability strategy to achieve BREEAM Very Good.

Rockmount School was a fast track 12 month programme, delivered over two phases so that the school could remain in operation throughout the whole process. Phases ran concurrently with the summer holidays.

As part of our sustainable solution we installed ground source heat pumps and specified building materials such as timber cladding to help achieve the client's aspirations.

Rockmount School's pupil, staff and head teacher are delighted with the result.

Location:
London Borough of Croydon

Client:
Apollo Education

Project:
New build and refurbishment of Primary School

Cost per m²:
£2100

Status:
Complete 2009

“The teachers, pupils and head teacher are delighted with their new school”
